

Tixi Wand.Box models W600

The new **Tixi Wand.Box W600** combines all the well known and intelligent Tixi functionalities with a big amount of analog and digital inputs and outputs and interfaces in an IP65 wall housing with 230V power supply and an emergency battery.

Choosing the **W640** model, the user is able to select the suitable combination of inputs and outputs for his exact field of activity. He can pick the **S1 modules** by himself and plug them into the 5 free slots. The model **W660** combines typical analog and digital I/Os in one device and offers 1 slot for an optional **S1 module**.
